

BACKGROUND

The foundation of the Canterbury Clinical Network Charter is a commitment to act in good faith to reach consensus decisions on the basis of 'best for patient, best for system.' Each SLA member will sign the SLA Charter and agree to the principles contained within it.

The Canterbury Clinical Network (CCN) was established to provide clinical leadership and demonstrate alliance principles across a multi-disciplinary team. The CCN leads the development of services across the sector where innovation and transformational change is required. The CCN consists of:

1. Alliance Leadership Team (ALT);
2. Alliance Support Team (AST);
3. Programme Office;
4. Workstreams;
5. Service Development Groups;
6. Service Level Alliances (SLAs).

GUIDING PRINCIPLES OF CANTERBURY CLINICAL NETWORK (CCN)

- Taking a 'whole of system' approach to make health and social services integrated and sustainable;
- Focussing on people, their families and communities, keeping them at the centre of everything we do;
- Enabling clinically-led service development; whilst
- Living within our means.

The Population Health and Access SLA will acknowledge and support the principles of the Treaty of Waitangi. We will strive for equitable health outcomes across our population/focus area through accessible, culturally appropriate services.

POPULATION HEALTH & ACCESS SERVICE LEVEL

1. BACKGROUND

- 1.1. The Population Health and Access Service Level Alliance was established in December 2017 to elevate the population health work in Canterbury to extend beyond the focus of PHO funded health promotion activities, to initiatives and approaches supporting improved health outcomes across the Canterbury health system and across partner agencies.
- 1.2. Previously a population health work group sat under the Flexible Funding SLA. This SLA had oversight for the health promotion spend across PHOs (Population Health in Primary Care Plan 2015 - 2018) and a proportion of 'Services to Improve Access' (SIA) and 'Care Plus' funds. The SLA's role was to develop and prioritise population health services that support people to take greater responsibility for their own health and making healthy choices, with a focus on improving access to primary health care for populations with higher health needs.
- 1.3. Through the new Population Health & Access SLA there is an opportunity to develop the Canterbury Health System's approach to addressing risk and protective factors (determinants of health) of our population's health and enabling the vision of a 'health promoting health system'.

2. PURPOSE

The over arching purpose of the Population Health & Access SLA is to monitor population level health (outcomes) and to provide advise and recommendations (to the system through ALT) on innovative and integrative ways of providing care and ways to enable a health promoting health system (to continuously and equitably improve those outcomes).

The purpose of the SLA may also include any or all of the following:

- 2.1. Identify mechanisms to innovate and implement towards the vision of a 'health promoting health system', to guide the prioritisation and investment in health care across our system, and to find ways to reduce disparities and inequities associated with access and health outcome;
- 2.2. Make progress against the first strategic objective of the Canterbury Health System - People take greater responsibility for their own health;
- 2.3. Facilitate the strategic alignment and planning of the Population and Public Health leadership across the Canterbury Health System through an alliance approach and based on metrics of demand and growth;
- 2.4. Forge partnerships and influence the policy and activities of our 'non health' cross agency partners to make progress on other health determinants;
- 2.5. Work with social service partners to develop a 'collective impact' strategy towards improved population health outcomes and drive collective responsibility for environments and systems that impact on health and wellbeing;
- 2.6. Advocate for and advise the Canterbury Health System and CCN groups on approaches that focus on influencing health behaviour, change equity of outcomes and enabling access to programmes and services for all population groups;
- 2.7. Monitor population-based health programmes; projects; services or opportunities across the Canterbury Health System i.e. Te Ha Waitaha – Smoking Service; Motivational Conversations project; Family Violence Project; Alcohol Harm System Advocacy and Strategy;
- 2.8. Measure and monitor population health outcomes across the Canterbury Health System;
- 2.9. Develop and implement a prioritising framework for population based health funding decisions based on understanding or knowledge of health need / outcomes i.e. targeted discretionary PHO funding (SIA and discretionary Care Plus);
- 2.10. Facilitate the development and implementation of the three year Population Health Plan for the Canterbury hHealth System.

3. PRINCIPLES

Principles to be determined by the SLA once established

4. MANDATE

- 4.1. The Population Health & Access SLA has the mandate to make recommendations to ALT and the funder/s on the design, development, provision and ongoing support and maintenance, of comprehensive population health services and approached including advocacy etc. that promote prevention wellness across the lifespan and across our health system.

5. SCOPE

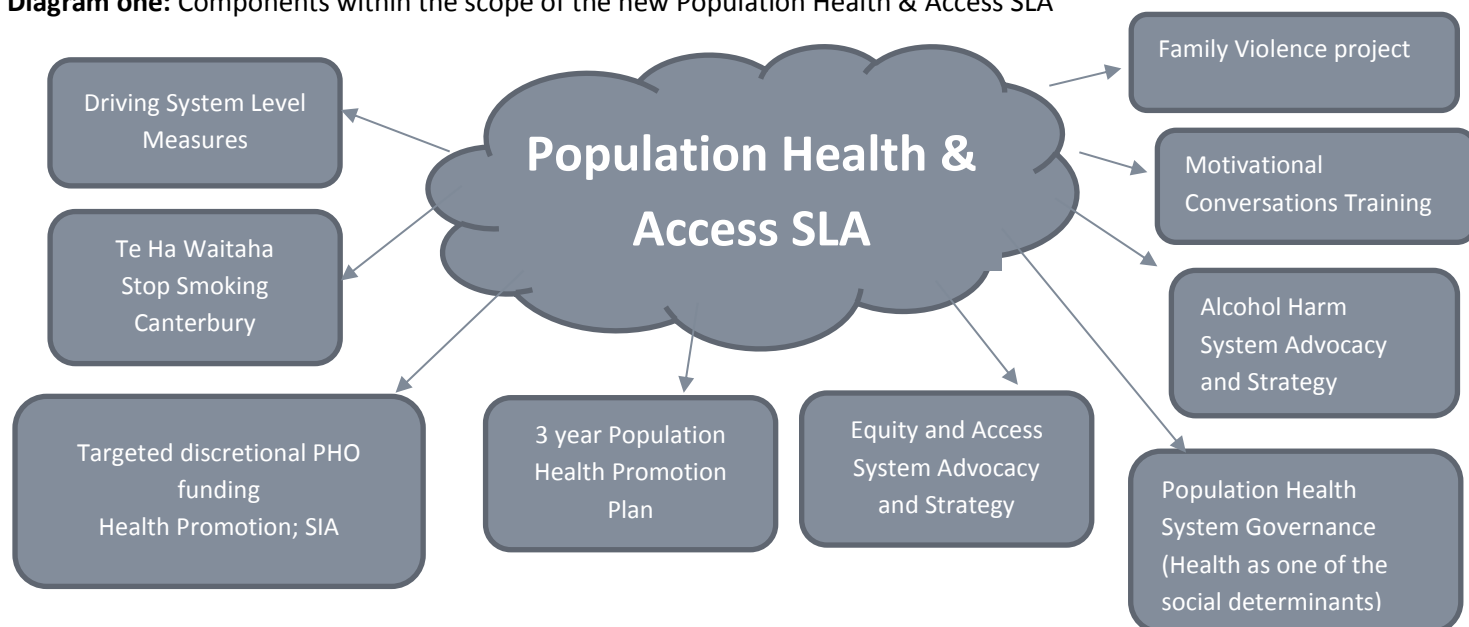

5.1. In Scope:
